AISA JEMILA

Personal Profile

A technology enthusiast with excellent interpersonal skills. I am always eager to be challenged, to grow and improve my soft and technical skills gained through previous experiences in the work environment. My career objective is to diversify in software development,data management skills and other related fields.

Highlighted Software Applications

Move Me Application - Dashboard, Full Stack Development   June 2019
URL:https://github.com/AisaJ/Move-Me-

A web dashboard to track the usage of the android application Move Me, which facilitates the home/office relocation transportation means upon requests.

- Implemented use of firebase and django synchronization which allowed the dashboard to access data from a common database with the android application

Adopt a Pet Application - Scrum Master, Full Stack Development   May 2019
URL:https://adopt-pet3.herokuapp.com/

A web platform for pet owners and lovers to adopt pet(s) and connecting with the required facilities needed in the care of a pet.

- Built in python and flask. Users can sign up, post their pets wishing to be put for adoption and also select a pet they like to adopt.

Technical Skills

Proficient: Routing and Switching, JavaScript, HTML5, CSS3, MySQL, Linux
                system, JQuery

Experienced: Python, Flask, Django, Postgresql, Software
                testing, AngularJS, Firebase, Typescript

Personal skills

- Social, easy to interact with and approachable
- Organized, always ensure there is a flow in work done and the environment used.
- Team player and management, able to collaborate in a team in achieving or building a project

- Critical thinker, before executing or applying a solution, will first evaluate the best and most convenient approach
- Dependable, can be entrusted with work delegated and responsibilities in absence of a partner/head
- Good communication skills, facilitated a UI/UX workshop at Moringa school
